PATENT
H0001340

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Zelina, Joseph : Batch No.: None
Serial No. 09/848,701 : Group Art Unit: 3746
Filed: May 2, 2001 : Examiner: Koczo Jr., M.
For: Partial Premix Dual Circuit Fuel Injector

PETITION TO WITHDRAW THE HOLDING OF ABANDONMENT

Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

RECEIVED
SEP 10 2003
TECHNOLOGY CENTER R3700

Sir:

Applicant petitions to withdraw the holding of abandonment mailed 10 April 2003. This petition is based on applicant's non-receipt of an Office action.

Pursuant to MPEP 711.03(b), an Applicant may have the holding of abandonment withdrawn upon a showing of non-receipt of an Office Action. Accompanying this petition is a statement from Robert Desmond, Chief Patent Counsel, Engine & Systems of Honeywell International Inc., the assignee of the above application, which explains that the Office Action which led to the instant abandonment was not received by Mr. Desmond and that a search of the file jacket and docket records indicates that the Office Action was not received.

Additionally, attached to Mr. Desmond's statement is a copy of the docket record where the non-received Office Action would have been entered had it been received and docketed.

09/08/2003 BABRAHA1 00000048 09848701

01 FC:1460

130.00 OP

Payment of the petition fee in the amount of \$130.00 is enclosed.

Based on the accompanying showing and supporting evidence, Applicant respectfully submits that Office Action in question was not received by the Applicant and the subsequent abandonment should be withdrawn. Applicant therefore respectfully requests that this Petition be granted.

If there are any questions or comments or if further information is required, it is requested that the undersigned be contacted as set out below.

Respectfully submitted,

By:

I, Robert Desmond, declare as follows:

I am the Chief Patent Counsel, Engine & Systems, of Honeywell International Inc., the assignee of the above-identified patent application. I am the attorney of record for the above-identified application.

The above-identified application was filed on 02 May 2001. It appears that Examiner Koczo issued an Office Action, made final, on or about 10 October 2002. The Office Action was mailed to the Applicant's address on record but returned to the USPTO due to the United States Postal Service being unable to deliver it to the Applicant.

The Office Action was re-mailed to the Applicant at the same address on or about 21 November 2002. Again it was returned to the USPTO due to the United States Postal Service being unable to deliver it to the Applicant.

Pursuant to MPEP 707.13, the present application was abandoned on or about 10 April 2003.

On or about 26 June 2003, a Notice of Abandonment was mailed to the Applicant at the Applicant's address on record. It was received by my office on or about 09 July 2003.

Neither the 10 October 2002 Office Action nor the re-mailed 21 November 2003 copy was received by me or by my office. I have searched the file jacket of the above-identified application and the docket records to determine if such Office Action, or re-mailed copy, was ever received by me or by my office. My search revealed that no such Office Action was received by me or by my office.

A copy of the docket record where the nonreceived Office Action would have been entered had it been received and docketed from the date of mailing of the Office Action (10 October 2002) until the last date to respond to such Office Action (10 April 2003) is attached hereto. The docket record confirms that the Office Action was never received.

I declare under penalty of perjury that the foregoing is true and correct.

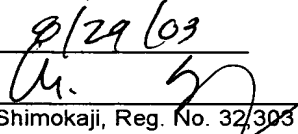

Robert Desmond

** Abstract **

Abstract A LOW EMISSION FUEL INJECTION SYSTEM AND COMBUSTION CHAMBER
FOR USE IN GAS TURBINE
ENGINES COMPRISES ONE FUEL INJECTION BODY HAVING A DUAL CIRC
UIT TO SUPPLY BOTH
PILOT AND MAIN FUEL SYSTEMS. BOTH PILOT FUEL CIRCUIT AND A
MAIN FUEL CIRCUIT INJECT

FUEL AT ESSENTIALLY THE SAME AXIAL AND RADIAL LOCATION. THE RECESSED PILOT FUEL INJECTION SITE IS ALONG THE COMBUSTOR CENTERLINE INTO A SWIRLING AIR PASSAGE PRODUCED BY AXIAL AIR SWIRLERS. THE MAIN FUEL IS INJECTED RADIALLY THROUGH A PLURALITY OF INJECTION SITES, AT A COMPOUND ANGLE, INTO THE INNER DIAMETER OF A SWIRLING AIR PASSAGE PRODUCED BY RADIAL AIR SWIRLERS. THE FUEL/AIR RESIDENCE TIME PRIOR TO ENTERING THE COMBUSTION CHAMBER IS RELATIVELY SHORT, MINIMIZING THE LIKELIHOOD OF AUTO IGNITION. DURING PILOT CIRCUIT ONLY OPERATION, THE FLAME IS STABILIZED BY A SWIRLER PRODUCED RECIRCULATION ZONE, PRODUCING HIGH TEMPERATURES TO COMPLETELY BURN THE FUEL PRODUCING LOW CO AND UHC EMISSIONS. DURING INTERMEDIATE AND HIGH ENGINE POWER CONDITIONS, BOTH THE MAIN FUEL AND PILOT CIRCUITS DISCHARGE FUEL INTO A SWIRLER PRODUCED, HIGH AIR FLOW, RECIRCULATION ZONE PRODUCING A FUEL LEAN, LOW TEMPERATURE FLAME TO REDUCE NOX EMISSIONS.
